Splash!

Pacific Chorus Frog

Splish, splash.

What is that sound?

What is hopping and
jumping around?

What loves to swim?

What loves to eat bugs?

It's a frog!

Can you hop like a frog?

Q

What happened to the frog's car
when it broke down?

It got toad.

A

Frogs live all over the world, except Antarctica. Frogs usually live in wet places. They like rivers, lakes, and ponds.

Habitat:

The natural place where a plant or animal lives

But some frogs live in trees. Some even live in the desert. Frogs can be found all over the world. Wherever they live, that's their habitat.

Croak!

公众号：Wecancan

Look at this frog croaking! Some frogs' throats puff up when they make sounds. Each type of frog makes its own sound.

Lake Frog

Coqui Frog

Ribbit!

Croak: The deep, hoarse noise that a frog makes

The coqui frog is named after the sound it makes. It sounds like "CO-KEE!" This frog is the size of a quarter. Even small frogs can make loud noises.

Frogs make different sounds for different reasons. Sometimes it's to warn other frogs of danger. Sometimes it's to call to frogs nearby.

Dancing Frog

This frog lives around noisy waterfalls. Other frogs would not be able to hear its calls. So it dances instead! It sticks out one leg, and then the other. Can you dance like this frog?

Frog Food

What is a frog's favorite food? Usually it's insects. Frogs eat dragonflies and crickets and other bugs.

Green Frog

Amazon Horned Frog

Some frogs eat bigger animals like worms and mice. The American bullfrog even eats other frogs!

American Bullfrog

Q

Why are frogs so happy?

They eat what bugs them!

A

What's that pink flash? It's how a frog catches bugs. It shoots out its long, sticky tongue at a passing bug. The frog pulls the bug into its mouth.

公众号：Wecancan

If your tongue were as long as a frog's, it would reach to your belly button!

Green Tree Frog

Every Size and Color

Frogs can be many different sizes.

The smallest frog is as big as a fingernail.

The largest is as big as a rabbit.

Frogs can be different colors, too.

Tiger Striped Leaf Frog

Some are green or brown.

Amazonian Poison Dart Frog

Others have stripes or spots.

Red Poison Dart Frog

Frogs can be red, yellow, or orange.

Blue Poison Dart Frog

They can even be bright blue!

Watch Out!

These colorful frogs may look pretty. But watch out! These frogs have poison in their skin. Their bright color warns enemies not to eat them.

Frog Babies

All frogs, even the Terribilis, have mothers. Mother frogs lay eggs. When the eggs are ready, out pop the tadpoles!

Tadpoles are baby frogs. But they don't look like frogs yet. Tadpoles have tails. They live only in water.

Pacific Tree Frog Tadpole

Tadpoles grow up to be frogs.
